LOCAL NEWS.

Mr and Mrs S C Elliot intend making a trip to Scotland and England this summer, leaving Stony on or about June 26, and sailing from Montreal.

Mr J S Simmons, who played on Stony's ball team for several seasons, is now in Frisco, holding down a responsible position in a financial institution.

The annual meeting of the Athletic Ass'n has again been postponed.

Mr and Mrs Zohny, of Edmonton, visited on Sunday with Mr and Mrs Oeming in Stony.

Paul Meredith was up from Spruce Grove on Sunday with his new straw hat, and cigaret.

Mr John Armbruster arrived home Tuesday from his trip to St. Louis, where he had been the last three weeks, suffering from the torrid temperature.

Mr R V Robertson of Crossfield, Alta, is the new accountant at the local bank, replacing Mr S C Elliot, who is leaving Stony with the best wishes of a host of his friends.

A very charming evening was spent Friday last at the home of Mr and Fritz Ducholke, on Meridian Road, the occurrence being the celebration of the 70th anniversary of Mr Ducholke's birth. All the near relatives of the worthy old couple were present, and wished Mr Ducholke many happy returns.

Miss Emilia Miller, the well-known young lady of Stony Plain and daughter of Mr and Mrs Ph Miller, was operated on for appendicitis last Friday in Edmonton, and is now reported to be "doing very nicely."

One of the light cars owned by a farmer in this district was run into on the road east of town by a large car from the city. The large one was not much the worse for the encounter, but the damage to the smaller is estimated at \$300.

Sam Zucht has put a new Chevrolet truck on his express line to the City. Meredith Brothers have bought a new Chevrolet truck, to be used in their hog-buying business.

"Hal" has returned; the Mayor of Detroit got back from his vacation in time to relieve Hal of the job of looking after the affairs of that burg, so Hal jumped into his Buick car, bought another dollar's worth of gas and was prepared to let 'er flicker. He did the distance 2,900 miles in 29 hours, including the eats and naps. Coming thru the Grove he slowed down to sixty miles an hour and gave Joe the high sign. The casualties for the trip are: 2 lamp-posts, 1 fire hydrant, 4 chickens badly damaged, 1 bust tube, 2 springs and 1 commandment broken.

Get It at HARDWICK'S.

REVEREND ROSE TEA "is good tea" Over 30 years a standard wherever good tea is liked.

Learn a Trade

A striking and highly significant chart has just been issued based on returns made to the Dominion Bureau of Statistics at Ottawa, and one which should convey a sharp lesson to all parents and to thousands of youths and young men.

This chart, which is easily understood, is in two parts. Part one sets forth the average hourly rate paid eight trades in each of thirteen Canadian cities, while the second part shows the average hourly rate of wages paid labor in building trades in these thirteen cities.

Th first part, while interesting and instructive, does not carry the same important object lesson to people as does the second part. It does show that the average hourly rate is higher in Winnipeg than elsewhere in Canada, with Regina second, Toronto, Calgary and Edmonton tied for third place, Vancouver fourth, and with Victoria, Hamilton, Ottawa, Montreal, St. John, Halifax and Quebec following in the order named. In the five cities first mentioned the average hourly rate of wage is in excess of ninety cents, including laborers, while in Quebec, the lowest, it is sixty cents.

The second part of the chart shows that the average hourly rate of wages paid taking all these thirteen cities together was as follows: Bricklayers, \$1.10; plasterers, \$1.06; stonecutters, 85 cents; plumbers, 83 cents; electricians, 80 cents; carpenters, 78 cents; painters, 71 cents; laborers, 41 cents. Working these rates out on the basis of an eight-hour day, we get the following results: Bricklayers, \$8.80; plasterers, \$8.48; stonecutters, \$7.44; plumbers, \$7.04; electricians, \$6.40; carpenters, \$5.60; painters, \$5.68; laborers, \$3.28.

In other words, the young man whose parents took a sufficiently deep interest in his welfare to see to it that he learned a trade, or the boy who as a result of his own ambition and initiative mastered a trade, commands a wage two to three times as great as the one who is not so equipped for life's work.

Nor is this all. The trained workman can usually find employment when the common unskilled laborer has to spend half his time looking for work and frequently without being able to get it, or anything better than an odd job now and then. At the present time in several Western cities the building trades are very active, and the statement has been made that there is no need for any man to lack employment. Nevertheless, scores of men were out of employment. Why? Because at the very time when bricklayers, carpenters and other artisans were being imported from other cities to meet the demand, there was a surplus of pick and shovel men for whom no work could be provided.

In modern construction on any large scale, excavations are now dug with steam shovels, cement is mixed by machinery, hoisting is done by machinery, with the result that only a minimum number of laborers is employed. The work is thus done more rapidly and much cheaper, and higher wages can be paid the skilled workers because of the greater and better results achieved. The unskilled laborer alone suffers.

A survey of the work of philanthropic organizations and government and municipal relief bureaus reveals that it is largely to laborers and their families that food and clothing relief have to be provided, while the lists of unemployed men in the Employment Offices is almost entirely those who have no qualifications or classification except that of "laborer."

True, the country must have those who will do the rough pick and shovel work, the simple but heavy work of carrying and lifting, but this need will always be met out of the ranks of those who lack the mental powers, the necessary application, the force of character, to learn and master a trade. But when their ranks are swollen out of all proportion by thousands of mentally alert, physically fit men whose parents, or themselves, fail to provide equipment for any worth while work in life, a situation is created which is extremely serious both for the man himself and his dependents, and the country at large. And these men, who ought to be making a real contribution to the welfare of the race, are actually stumbling blocks in the path of, and a menace to the livelihood of, their less fortunate fellow men, who, because of lack of proper endowments, are unfitted for any tasks but those of the laborer.

A parent should not, of course, compel their boys to adopt a trade or follow an occupation against the boy's inclination and desires, but it is one of the duties of parenthood to see that the children are properly equipped for life's struggle, and that equipment should include knowledge of some useful occupation, handicraft or trade. No boy in this country and in this age should be sent forth to face the world unable to do anything but the lowest and cheapest form of manual labor.

Largest Lace Curtain Made

One of the lace manufacturing mills in England has turned out in one piece a lace curtain 150 feet long and 50 feet wide. It is said to be the largest single piece of lace ever turned out in any of the factories throughout the world.

A tablet to the memory of Madame Marie Harol, creator of "camembert cheese," has been placed on her cottage in Brittany.

Tests have been made that show that human life can be sustained at 7 1/2 miles altitude.

Senate Reform

Question Of Its Own Reform Is Raised In Upper Chamber

Senator McMeens, Winnipeg, in the senate asked: "When does the government propose to call a conference of the provincial premiers to consider senate reform?"

"May I be allowed to ask if this house is anxious to be reformed?" interjected Senator Belge.

Senator Dandurand, in reply, said he would bring the question to the attention of the government, and would suggest at the same time that the opinion of the provincial premiers on the reform of the House of Commons might be ascertained.

Forest Fires Are Costly

British Columbia Paid Over Three Million Last Year

Forest fires cost British Columbia about \$3,500,000 last year, according to figures compiled by the forest branch of the lands department and made public by Hon. T. D. Pattullo, minister of lands. This total was made up through property losses, including timber, of nearly \$2,750,000; \$617,000 spent by the government in fire fighting and \$133,000 spent for the same purpose by private companies.

Trade In Horse Meat

A trial shipment of Alberta-raised horse meat has been sent to Belgium, and if it suits the needs of that market, a considerable trade is anticipated. About two tons of marketable meat were frozen and shipped on a dedicated order from Brussels, and a shipment was also made to Japan where there is a potential market. If the results are satisfactory a profitable method of disposing of scrub horses will have been developed.

WHEN DIGESTION IS ON STRIKE

Food Fails to Nourish—Relief Can Be Had Through Dr. Williams' Pink Pills

Is your digestion at fault? Do you turn away from your food at meal times; although you need the nourishment your food should give you? Is what you eat followed by pain, flatulence or nausea? These symptoms show that your stomach is in no state to digest food even if you eat it. Do not rely on remedies that merely give temporary relief. A sound stomach depends upon rich, red blood, and if it does not do the work nature intended, the trouble must be corrected through the blood and there is no better way to build up the blood than by taking Dr. Williams' Pink Pills. Every dyspeptic who has tried them is delighted with the improved appetite and strength that so quickly follow their use. Mrs. A. Quinlan, Stratford, Ont., is one who has testified to the trouble this medicine has done for her. She says:—"I feel it a duty to let you know what Dr. Williams' Pink Pills have done for me. Some time ago I suffered severely from indigestion, which left me run down and nervous. I could neither eat nor sleep well, and decided to consult a doctor. He told me that I was anemic, and gave me some medicine, but as it did not appear to help me, I decided to try Dr. Williams' Pink Pills. I got three boxes and by the time I had taken them I felt better. I then got three more boxes and when I had taken them I felt like a new woman, and I was again able to do my housework and have not since had any return of the trouble."

Dr. Williams' Pink Pills are sold by all medicine dealers, or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet "What to Eat and How to Eat," will be sent free to any address for the asking.

New Market For Canadian Wheat

Mexican Millers Purchase Portion of Their Requirements Here

According to six indications a gratifying success has attended efforts made to induce Mexican millers to purchase a portion of the wheat they need from Canada. During 1926 shipments were made through New York brokers and later direct from Canadian exporters through New York. Now shipments are being made through Vancouver via Panama Canal to Vera Cruz and Tampico. This is a new market for Canadian wheat and promises to be an increasing one. In the eleven months ended February, 1926, Mexico took 110,065 bushels of Canadian wheat, this being more than double the quantity taken in the same period ending February, 1924.

SUNDAY SCHOOL LESSON

JUNE 27

REVIEW: WHAT WE HAVE LEARNED FROM THE BOOK OF GENESIS

Golden Text: We know that to them that Love God all things work together for good, even to them that are called according to his purpose. Romans 8:28.

Devotional Reading: Hebrews 11:4-22.

Rev. W. H. Bennett, in his introduction to the Book of Genesis in "The New Century Bible," gives the following excellent survey of the permanent messages of Genesis:—"The Patriarchs appeal to us, interest and help us, because they are types of classes of men; their adventures have been—and are still—many Abrahams who have gone out, not knowing whither they went, in obedience to some dictate of conscience, or in some prospect of spiritual advantage, rightly interpreted as the call of God; many Jacobs, who have, so to speak, stumbled into the Divine Presence, when their only thought was of heading light from the consequences of weakness, folly and sin; many Josephs, too, who have found in humbling trials the appointed pathway to honorable service. Such vicissitudes of fortune or of conduct are not far from any of us, and we are all encouraged by the possibilities of grace suggested by these narratives which have preserved them, and procure for them a place in Scripture. Many generations felt that they expressed real experiences, and therefore handed them on as their own testimony also to the righteousness and love of God."

Saskatchewan Fish

More Than a Million Pounds Shipped Annually From Northern Part of Province

Fifty carloads of fish—more than a million pounds—were shipped annually from Big River, in Northern Saskatchewan, to points in the United States. Large quantities of fish are also shipped from that point throughout the various centres in the western provinces for home consumption. This year shipments of Western Canadian fish have been made direct to Los Angeles, Calif.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

Salt Wells At Fort McMurray

The salt wells at Fort McMurray now being developed by the Alberta Salt Company, are producing twenty-five tons of salt daily, according to advices received. The supply is abundant, two seams ranging in thickness from 120 to 140 feet now being mined, at depths from 600 to 800 feet.

Minard's Liniment for burns

Wainwright Oil Refinery

Will Have a Daily Capacity of One Thousand Barrels

It is expected that a refinery of 1,000-barrel daily capacity, known as the Wainwright Refinery, will be erected at Wainwright at an early date. This will be approximately the same kind of a plant as that now in operation at Edmonton, with a slightly larger capacity. It is understood that eight new wells are soon to be started in Wainwright field as a result of the success of the Edmonton-Wainwright well.

Her Whole Body Seemed to Be Affected

So Says Ontario Lady Before She Used Dodd's Kidney Pills

Mrs. L. A. Ross suffered with a severe attack of kidney trouble and found relief in Dodd's Kidney Pills.

Ottawa, Ont. (Special)—"I had a very severe attack with my kidneys about two years ago. So bad, I was laid up for over a week. My whole body seemed to be affected. I lost my appetite and was falling fast. At last I got a box of Dodd's Kidney Pills and they helped right away. I have not been bothered since."

This statement comes from Miss L. A. Ross, who resides at 432 Nelson Street.

Other sufferers from kidney trouble tell of pains relieved and health restored through the use of Dodd's Kidney Pills. They strengthen the weak kidneys and remove the cause of the pain.

There is no reason why anyone should continue to suffer when Dodd's Kidney Pills can be obtained from druggists everywhere, or The Dodd's Medicine Co., Ltd., Toronto.

Increase in Grain Shipments

Shipments of Canadian grain to British and European ports during the winter season from Saint John totaled 17,338,000 bushels, an increase of more than 4,000,000 bushels over the season 1924-25.

The use of Miller's Worm Powders insures healthy children so far as ailments attributable to worms are concerned. A high mortality among children is traceable to Saint John. These sap the strength of infants so that they are unable to maintain the battle of life and succumb to weakness. This preparation gives promise of health and keeps it.

If every man could believe every thing he hears about everybody else, how much better he would think himself than his neighbors.

One of the commonest complaints of infants is worms, and the most effective application for them is Miller's Worm Extirminator.

Horn-rimmed spectacles are a complete disguise for Sir Austin Chamberlain. He usually wears a monocle in his right eye.

This Washboard will wear for Years

IT'S so strong you could stand on it without doing it any harm. The rubbing surface is heavy SMP Pearl Enamel, positively smooth as glass, but unlike glass, it cannot break! And it won't wear out, like zinc. The back is heavily re-inforced with wood. It's a washboard that will last for many years, and remember, it is SMP made.

The Sheet Metal Products Co., 4 Canada Building
 Montreal Toronto Winnipeg Calgary

SMP ENAMELED WASHBOARD

Muskrat Farming A New Western Industry That Has Made Remarkable Strides

From all indications the new industry of muskrat farming continues to take hold of the popular imagination in a manner in which few newly developed Canadian activities have done, and from the way in which ambitious recruits with proclivities to visit out-of-door occupations are coming to engage in its pursuit there seems every likelihood of its coming to outstrip most other branches of the domestic fur farming industry. Marsh and slough land, formerly regarded as waste territory, in all sections of the country, is being fenced off and transformed into muskrat farms, either by farmers adding this sideline to their main activities or by newcomers engaging in this profitable and interesting profession as a whole time pursuit. There is every evidence that soon the country will be quite thickly dotted with domestic establishments devoted to the intensive raising of muskrats for fur.

Certain sections of Alberta and British Columbia would seem in particular to be receiving marked attention. In the Peace River country of Northern Alberta, muskrat lakes continue to be taken up on quite an extensive scale, according to reports, to become domestic muskrat farms. The Columbia-Kootenay Valley, with large tracts adapted to the pursuit, is experiencing a somewhat similar invasion. A Milwaukee cattle rancher, establishing in the Lake Manitoba district of Manitoba, purchased an area of about 100 acres of swampy land, to turn into a muskrat farm to raise these valuable little animals on a large scale as a profitable sideline to cattle raising.

As establishments come periodically to be added it becomes evident that the prospects for the activity are showing a powerful appeal to important and expert interests, and that muskrat ranching is to be an industry pursued on an ever increasingly extensive scale. This is evidenced, for instance, in the acquisition of Swan Lake, Alberta, by the Bruce Furmidge Company, Ltd., of fifteen quarter-sections of land, on a total of 2,400 acres, to be turned into a muskrat ranch. The land has already a thriving nucleus in the several existing colonies, and these will be added to and the entire establishment thoroughly protected. It is further evidenced in the location at Swan Lake, north of Quenneville, British Columbia, of what is to date the largest muskrat farm in the Dominion. Last fall the "Muskrat Farm," had secured possession of 3,633 acres of low-lying ground surrounding the lake, taking in the adjoining meadows and streams, which are already dotted with numerous muskrat houses, from which trappers have taken a toll for years.

Homestead Entries

All Provinces Record a Considerable Increase in Applications

Homestead entries in Western Canada during the month of April last show a considerable increase over the corresponding month last year, having numbered 552, as against 315, according to a report issued by the federal lands patent branch. By provinces the entries were as follows: British Columbia, 112; Alberta, 319; Saskatchewan, 224; and Manitoba, 96. For the first four months of the current year, the cumulative total of homestead entries was 1,909, as against 944 in the same period of 1928. All provinces recorded an increase.

Alberta Coal Production

Coal production in Alberta during the month of March last showed a considerable advance over the output of the corresponding month in 1928, according to a report of the chief inspector of mines. The output for March, 1929, amounted to 129,523 tons of all grades, as against 387,097 in the same month last year, an increase of 1,516 tons.

Judge—Did your wife hit you with a glove of velvet?
Mulligan—Didn't break about it, yer honor; just the blick.

If a man never has anyone to tell him what he would do if he were in his place, that man is a fool.

W. N. B. 1924

Hog Trade Improving

Warning Is Given To Raisers Against Over Feeding

The livestock branch of the department of agriculture at Ottawa is able to report, in its sixth annual report, covering the year 1928, general improvement in the market situation compared with 1924, and seemingly excellent prospects for the immediate years coming. Particularly is this true as regards the hog trade, in connection with which, however, it gives warning against over feeding, when food is plentiful and under feeding when food is scarce. In other words, to retain our regained standing on the bacon market, there must be uniformity in feeding in all circumstances. Having re-established our product on the British market as high quality bacon, marked increase in the percentage of fat bacon would be about the most unfortunate thing that could happen to our export trade. At no time, says the review, has there been need for greater caution, and we may well beware of the over-generous feed pail.

Cattle Pool At Coast

B.C. Stock Breeders' Association Favors Co-operative Marketing

A pool for the co-operative marketing of beef cattle will probably be established in British Columbia at an early date under the auspices of the British Columbia Stock Breeders' Association. A party of directors and members of the association have completed a tour through the Cariboo and Chilcotin cattle raising districts, holding meetings at all the principal points. Co-operative marketing was the chief topic at all the meetings, and the success which has attended the Fraser Valley Milk Producers' Association in regard to the co-operative handling of dairy products, was outlined by President W. J. Park of that association. At every meeting a resolution in favor of co-operative marketing of beef cattle was unanimously adopted and a committee has been appointed by the Stock Breeders' Association to work out a scheme to that end. The committee will probably visit the districts to investigate pool cattle shipments there.

Dairy Prizes At Winter Fair

Some Changes Made In Awards, For Toronto Show

The executive committee of the Royal Agricultural Winter Fair have recently approved of some changes recommended in the prize list for this year's show, scheduled for November 12-20, in the Royal Coliseum, Toronto. The most important amendments were made in the dairy products section, in which the prize money remains the same as in 1928, with the exception of sections 1 to 4 in classes for butter, to be awarded under the group system this year. In connection with the butter section, General Manager Westervelt announces the donation of two silver cups by the Hon. George E. Henry, M.P., one to be awarded to the exhibitor securing the highest score in any section of the cheese division and the other to the exhibitor securing the highest score in any of the butter sections.

Modern Muskrat Farm

The Beaver and Muskrat Farm, which is located near Willam, British Columbia, is now fully stocked and in running order. It is without doubt the most modern of its kind in the whole Dominion. The farm covers about 70 acres and is completely enclosed with a specially constructed palisaded iron fence.

Alfalfa Seed Industry

Alfalfa seed growing, a comparatively new industry for Alberta, is proving very successful. The Brooks Alfalfa Seed Growers' Association has sold all it can grow. Two or three carloads have been sent to the United States.

Insurance Agent: "Any insanity in your family?"
Mrs. Snodgrass: "Well, no, only my husband fancies he is the head of the house."

Exhibiting Dairy Butter

Should Use Nothing But Absolutely Sweet and Clean Cream

The making of butter for home use is still the common practice on the majority of farms. Until creamery butter became more accessible to farmers, it will very likely continue to be economical to do so. In some cases, a surplus is sold, but it is not probable that this practice is profitable source of revenue in most cases, compared to selling cream. However, where butter is made, it should be the aim of everyone responsible for this work to make good butter.

A very good method of making improvable and of keeping in touch with better quality standards is to make it a point to enter butter for competition at the provincial and local exhibitions. Besides the educational and advertising features, which may be shared by participating in these competitions, there is the further incentive of the substantial cash and value prizes which are offered.

No creameries now use rancid but absolutely sweet and clean favor of cream in making exhibition butter, and it is always thoroughly pasteurized. In making dairy butter for exhibition purposes, it is well to keep this in mind, especially because the judges for the creamery butter usually also judge the dairy butter. In pasteurizing, the cream should be heated to a temperature of 170 deg. Fahr. and held at that temperature for at least ten minutes and then cooled to churning temperature as quickly as possible. Churning should not take place for two hours or more after the cream is thoroughly cooled, and the fact that pasteurized cream may be churned at a temperature three or four degrees lower than raw cream is also important. This lower churning temperature results materially in producing firm, close texture, which is wanted in good butter, as well as the milk sweet flavor.

"Does your wife take to bridge?"
"She takes to it more than she bridges back."

"If two souls have but a single thought it is useless to waste any time contemplating matrimony."

Immigration And Colonization The Most Important Problem Confronting Canada To-day

Will Eliminate Sheep Duty

Decision of Government Means Boom For British Columbia

Thousands of sheep will be brought into British Columbia next year as a result of the Federal Government's decision to waive the duty on breeding stock for a twelve-month period, according to officials of the provincial department of agriculture.

The Ottawa authorities' plan to allow breeding sheep to be imported without payment of duty follows upon suggestions of the British Columbia department of agriculture through A. C. Whitney-Griffith, president of the Farmers' Institute and well-known sheep expert. While in Ottawa recently, Mr. Whitney-Griffith secured from the federal department of agriculture a promise to eliminate the sheep duty next year.

"Inside three years there will be as many sheep in the Cariboo, Chilcotin and Nicola districts as there are all over British Columbia today," Mr. Whitney-Griffith predicted. "The ranchers of the interior actually have found that they make far more for every dollar invested in sheep than they do on their cattle operations."

Grain Still Moving

Heavy Marketing of Grain at Points On C.N.R.

Marketing of grain at points along the Canadian National Railways at most reached the two million bushels mark for the week June 4 to 10. During that period farmers brought in 1,930,000 bushels, while 1,918 cars carrying 2,679,000 bushels were loaded at country elevators along the same lines. These figures are more than three times those for the same period last year, and there is still 3,514,000 bushels in store at C.N.R. points. This amount is distributed through the three provinces, Manitoba having 784,000 bushels, Saskatchewan 1,536,000 bushels, and Alberta 984,000 bushels.

MINAKI—A SECOND JASPER

When the plans now being hurriedly design and appointment, will be carried forward as rapidly as conditions will permit. For the present the administration building will be used for the common rooms of the hotel and there will be cabin accommodation this summer for 140 guests. The photograph shows one of the cabins.

Minaki, last summer, will be under the management of Mr. and Mrs. J. A. Turner, both of whom have had long experience in hotel work. They are shown in the photograph. The nine-hole golf course is in excellent shape and will be under the direction again of E. J. (Ned) McKinnon, who proved such a popular pro last summer. Improvements have also been made to the tennis, fishing, boating and swimming facilities.

Mr. A. B. Calder, of Montreal, representing the department of colonization and development of the Canadian Pacific Railway, in the course of an address at a land settlement conference held recently in Edmonton, said, in part:

Immigration and colonization is the most important national problem confronting Canada. There is not a man in this audience and few in Canada, but is convinced of the supreme necessity of settling, securing and settling in Canada a prolific population. By a producing population, I mean, in the first place, sustain themselves and their families, produce that for which there is always a market abroad, and as such may be of those things for which there is a market at their own doorways. At present that source is the soil and in my opinion that must continue to be one of the great sources for some years to come.

Nations are not made in cities and are only helped by the men of the cities who are gifted with vision, sympathy and understanding. I do not intend that the man who tills the soil is by nature or at heart, not apart and superior to his urban fellow citizen, but I do think that endowed with the same type of vision, the very nature and experience of the farmer-toil makes of him a superior to his city brother. It has been poetically observed that "Nature never yet betrayed the heart that loved her." And the nearer we get to Nature's year, the better men we become and those who earn their daily bread in contact with Mother Earth and who the bears, are the backbone of a country.

I have devoted this much time to the phase of what I term the grandeur of the farmer's calling, because it occurs to me that there is at times a disposition to minimize the value and importance of the agriculturist in our economic life and that when certain legislation favors are demanded, it is with the expectation that the agriculturist is of secondary importance. Permit me to interject at this moment that if these plans are reasonably well filled with a producing population, then the purely industrial enterprises will have nothing to complain of. Their troubles will be mere trifles, to vanish with the advent of that population and development we are assembled to promote.

The actual value of a family of agriculturists to a marketing centre, whether it be a village town or city, is immediately appreciated by the residents of such communities. Investigation has enabled our department of colonization and development to demonstrate that an agricultural family of five people, located on a producing farm, spend an annual budget of \$1,500 for clothing, implements, groceries, etc., which cannot be produced on the farm, and they, therefore, add that value to the merchants in their respective towns.

An increased and increasing population at work on our fertile prairies will settle not only our manufacturing problems, but will materially assist in settling the problem of our over-built railway mileage.

Saskatchewan Creamery Butter

Production Is Increasing At A Very Satisfactory Rate

Creamery butter production in the province of Saskatchewan for the month of April, 1929, amounted to 7,625,564 lbs. as compared with 72,512 in the same month last year, an increase of 45.2 per cent., according to a report issued by the provincial dairy commissioner. The cumulative production for the first four months of the current year is 3,220,314, as against 2,668,162 pounds in the same period last year, an increase of 20 per cent.

Butter Men To Compete

Two silver cups for competition among butter producers of the Dominion have been donated by Hon. George E. Henry, Minister of Agriculture for Ontario, it was announced by the executive of the Royal Agricultural Winter Fair at Toronto.

"Do you believe in capital punishment?" "Certainly," replied the walking delegate for the "Dumb-bell League," "the working man won't get me justice till capital is punished."

WILSON'S FLY PADS

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Drugists and General Stores—10c and 25c per package.

WORLD HAPPENINGS BRIEFLY TOLD

Revenue of Temperance Council of Christian Churches in England and Wales is subject to taxation under a decision rendered by the King's Bench division.

A world survey showing that about 20,400 persons were killed and \$88,000 injured in automobile accidents last year, is made public by the American Road Building Association.

The woman of today wears fewer clothes on the street than her grandmother wore to bed, says Senator Norris, of Nebraska, during a discussion in the senate.

M. Bronsky, a member of the finance ministry, says that as an outgrowth of extraordinary measures taken by the Soviet Government, the chevronets, the new Russian gold unit of value, has now been definitely stabilized.

General strikes which would involve the violation of wage agreements were condemned by William Green, president of the American Federation of Labor, in an address before the convention of the Rotary International at Denver.

The British Trades Union Council, through its acting secretary, Walter M. Citrine, denied that the Russian Soviet Government has sent funds to British strikers, and brands reports of such remittances as misrepresentations threatening to "endanger relations between Great Britain and the Soviet."

For Frost Bites and Chills.—Chillblains come from undue exposure to slush and cold and frost bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

To Show Surplus

Manitoba Government—Will Have Balance on Right Side of Ledger

A surplus approximating \$550,000 will be shown by the Manitoba Government for the fiscal year which ended April 30 last, according to reports obtained in government circles.

In his estimates, Premier Bracken, as provincial treasurer, anticipated a deficit of about \$145,000.

The favorable balance is attributed to under-expenditure for certain appropriations and to unexpected returns from certain sources of revenue.

France Holds Different View
France reiterated her contention that land, naval and air armaments cannot be treated separately in an effort to bring about any degree of disarmament. This view, on the whole, differs from the British and United States thesis that they can be studied separately.

Clemenceau Shuns Publicity
M. Clemenceau, former premier of France, has made arrangements so that France will not be known of his death until he has been buried a fortnight.

WESTERN FARMS WANTED BY

THE NEW FRENCH REMEDY, NO. 2
"THE THERAPON"
This is a new French remedy for all kinds of rheumatism, sciatica, neuralgia, etc. It is a powerful and effective remedy, and is sold by leading druggists, or can be obtained direct from the manufacturer, M. J. B. Bouchard, 10, Boulevard de la Chapelle, Paris.

W. N. U. 1834

Canada's Valuable New Industry

Eastern Canada's pulpwood resources are furnishing nearly all the raw material for the manufacture of rayon, a commodity which is gradually replacing genuine silk on the market, according to Dr. W. Hale Clark, who spoke to a large audience on "rayon" in Montreal, under the auspices of the Canadian Chemists Convention.

Rayon is made entirely of wood pulp; the Canadian spruce tree being the favorite for the purpose, said the speaker. At present nearly all the manufacturing is done in the States and Europe, though there are two factories in Canada, one of which is in Quebec.

The most modern machinery is used, and nearly everything is done automatically. The total rayon production for the last year amounted to a hundred and eighty-five million dollars.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are bricking gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most homes, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

One-piece Frock With a Two-piece Look

Jean Paton, in his recent showing, has returned to the type of wearable one-piece sports clothes for which he is best known; many of them flare with plaits, but all with bodice cut straight and comfortably loose, and having the waistline around the top of the hips. This type of dress seen in the model pictured here, whose box-plaited skirt-front is joined to the bodice under a deep tuck. Note the back view shows a flat silhouette. There are gathers at the shoulders, and the collar is of the convertible type, to be worn high or turned back. No 1091 is for misses and small women, and is sizes 16, 18 and 20 years, or (34, 36 and 38 inches bust only). Size 18 (36 bust) requires 4½ yards 36 inch for dress of plain material; or 5 yards wide bordered material for dress as illustrated. Price 30 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

More Preventable Than Curable

Some Conditions People Should Watch To Prevent Cancer

The tendency among cancer investigators, said Dr. George A. Soper, managing director of the American Society for the Control of Cancer, is to believe that the disease is more often preventable than curable. More accurate diagnosis in early stages of the disease he accredited as one of the most outstanding advances in cancer research.

"One should beware," he added, "of the broken tooth or dental plate which continually irritates the gums, cheek or tongue; of the spectacles which make the head sore behind the ear, on the temples or nose; of any sore which will not heal; of the mole or wart that changes in color, size or appearance; of indigestion which will not stop and cannot be explained; of any unusual and unnatural discharge from any part of the body and of any lump which does not go away."

"When any one of these conditions occur, you should go at once to a capable doctor and do what he advises."—New Report from Atlantic City.

Lost In The Jungle

Explorer Returns From Expedition to the Amazon After Many Adventures

Dr. W. M. McGovern, the explorer, has just returned from an expedition to the Amazon and Andes. For many months he has been missing, and it was generally thought that he had been killed. He was indeed lost for some time in the jungle and twice was attacked by hostile Indian tribes, but won his way through, after making remarkable discoveries. One of McGovern's companions was drowned in a whirlpool, and the explorer himself was at death's door for some weeks with a strange jungle malady. The whole party was greatly troubled by vampire bats and other poisonous animals and insects.

Fire Brick Clay

Important Discovery Is Made At Williams Lake, B.C.

Development is expected to follow the discovery of hard flint clay near Williams Lake, B.C. Already several shipments have been sent to Vancouver for tests and have been found to be comparable with the best clays on the market. The clay will withstand 3,200 degrees of heat and is highly acid-resistant. At the present time there are more than fifty industrial plants in this province using British Columbia fire clays for furnace linings, and it is also used in the manufacture of crucibles, insulating materials and pottery.

After 10 Years of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Develop Platinum Claims

Plans for the development of platinum claims on the northern border of Alberta involve the use of aeroplanes. One of these planes has already arrived in Edmonton and is being put into shape by those interested in the development of these claims.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

L. J. Coburn, Milwaukee, Wis., is the inventor of a device to keep a motorist's hands warm in cold weather. The heater is in the steering post and wheel and comes from the exhaust pipe.

Insect Bites.

Bee stings, mosquito bites, etc., are greatly relieved by applying Minard's.

Use Minard's Liniment in the stable

Are you being bored to death?

MOSQUITO torture is quickly ended if you keep a can of Flit handy.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills off the insects—and does it quickly. Get a Flit can and sprayer today.

Erect Big Flour Mill

Spillers Overseas, Limited, Will Have Large Plant At Calgary

It is stated that plans of Spillers Overseas, Limited, for the completion of their big mill at Calgary, are so far advanced that the contracts have been let to an English company for the equipment. The foundations and about two storeys have been finished and eight more storeys are to be built. The project, when ready for operation, will represent an outlay of from \$4,000,000 to \$5,000,000.

CANADA SHOULD DEVELOP OWN FUEL RESOURCES

Ottawa.—Recommendations for a national fuel policy, to supply Canada's coal consumption from her own mines, was made by Hon. G. S. Harrington, minister of public works and mines, in Nova Scotia, before the special committee of the house investigating the Dominion's anthracite supply.

Chief among the recommendations made by Mr. Harrington were:

(1) Governmental assistance to secure the erection of coking plants within Canada at points serving large centres of population;

(2) The granting of a subvention on maritime coal water borne to Montreal when carried by rail west of Montreal;

(3) Protection to maritime coal from unfair competition by American producers, and (4) Cancellation of the bonding privilege for American coal for bunker supplies in Canada.

"It appears to me essential that in Canada we make up our mind at the commencement whether or not we can adopt something in the nature of a national fuel policy, the aim and object of which would be to produce within Canada the coal that we consume in the Dominion," he declared.

Such a policy should, stated Mr. Harrington, be adopted.

He pointed out that thirty million tons of coal were consumed annually in Canada. Yet, seventeen million tons of this coal were imported.

A. J. Creighton, and E. H. McVilliams, Owen Sound, recommended a rail and lake haul from the head of the lakes of Alberta coal in preference to an all-rail haul in box cars. They suggested the briquetting of screen coal at the mines, and the establishment of coking plants at well populated centres.

Denial From Washington

United States Not Involved in Any Way With League Controversy

Washington.—Diplomatic officials made swift and emphatic denial that they had been involved even indirectly in the league controversy which resulted recently in Brazil's withdrawal as a league member.

E. V. Morgan, United States ambassador at Rio de Janeiro, told a categorical denial of a story that he had congratulated President Bernardes upon Brazil's resignation from the league.

Amendment Thrown Out

Change in Immigration Act Is Rejected By Senate

Ottawa.—The government bill to amend the Immigration Act was thrown out by the senate. The bill was designed to remove the provisions inserted in the act after the Winnipeg strike which authorized summary search of the premises of people suspected of association with seditious movements, and deportation without trial of any but Canadians found guilty under these clauses.

Hard Hit By Floods

Vienna.—Fourteen communes in Austrian Burgenland have been inundated by cloudbursts. Bridges were washed away and houses were burned after having been struck by lightning. Several communes in Upper Austria were devastated. "Owing to the heavy rainfall the Danube in Vienna has risen nine feet."

Auto Road Across Rockies

Lake Louise, Alta.—Eleven years after it had been surveyed and mapped out by the Dominion parks department, the first automobile highway across the Great Divide from Lake Louise to Field, British Columbia, running parallel to the Canadian Pacific Railway, was formally opened on June 16th.

Series of Robberies

Vancouver.—A series of burglaries, which resulted in goods to the value of approximately \$1,500 being stolen, most of the "jobs" apparently being the work of experienced gangs of thieves, was reported here from various towns on the lower mainland of British Columbia.

—W. N. U. 1624

Urge Equal Cattle Duty

Canadian Tariff Should Be On Same Basis As U. S.

Ottawa.—Equalization of the Canadian customs duty on cattle with that of the United States was recommended by a sub-committee of the whole House of Commons agricultural committee.

The sub-committee, appointed to consider the cattle question, reported that a "recommendation that the Canadian customs tariff against United States should be placed on the same specific basis as the United States tariff on Canadian cattle, with the provision that if the United States tariff be removed or reduced, the Canadian tariff would thereupon be removed or reduced to the same extent."

The sub-committee also recommended that Canada's minister to Washington be appointed at once and that the Canadian Government should enter into negotiations with the United States looking to the entry into the United States of Canadian cattle on a more favorable basis than at present.

Britishers Buy U. S. Fruit

Imports of Apples Larger Than From Other Countries

London.—Englishmen eat a larger proportion of apples from the United States than from any other country, according to figures published by the Imperial Economic Committee. It estimates the average Englishman in 1925 ate about 100 apples. Of these 38 came from the United States, 25 from the United Kingdom, 19 from Canada, and eight from Australia and New Zealand.

But of 70 oranges each Englishman ate that year only one came from the United States.

The committee estimates almost one-third of the annual payment on the debt to the United States of \$21,000,000 was paid in 1924 for American fruit.

Jazz Proves Fatal

Eminent London Musician Succumbs to Blast From Jazz Band

New York.—Professor Nicolo Covello, 79 years old, one of the best known musical composers of Europe, died in London, dropped dead in the bowery at Coney Island, following a nervous prostration, his relatives say, to a sudden blast from a jazz band in one of the concessions.

Professor Covello, born in Italy, but a resident in England for more than 50 years, arrived in New York two weeks ago enroute to visit his son, Howard Covello, a rancher in Saskatchewan. He was to have left for Canada this week.

Looking Into High School System

Rochester, N.Y.—W. Gibson, of the British Columbia department of education, was here gathering information on the operation of the junior high school system in which Rochester was a pioneer with a view, it is said, to establishing a similar system in Vancouver.

BALDWIN'S PLAN IS OPPOSED BY LABOR PARTY

London.—The parliamentary Labor party voted to resist strenuously the proposals outlined by Premier Baldwin in the House of Commons regarding re-organization of the coal industry.

The miners, at a special meeting presided over by former Premier Ramsay MacDonald, voted unanimously for a resolution declaring that the government's declaration of policy on the mining crisis regarding the hours of wages was a violation of the recommendations made in the report of the royal commission.

The resolution also stated that the government's policy was inadequate to meet the problems of the industry. It was a surrender to the demands of the mine owners and was calculated to prolong and embitter the industrial struggle in the coal fields.

Mr. MacDonald already had expressed the opinion that Premier Baldwin's suggestion for a partial suspension of the seven-hour day would serve to make the miners more solid in their strike.

Searching For Art Collection

Valuable Paintings and Jewels Have Disappeared in San Francisco

San Francisco.—The Russian department of the bank of Italy has begun a search for a collection of paintings, bronzes and precious stones valued at \$500,000, supposed to have been stored in a bank vault three years ago.

The collection was assembled in the far east by the late Ivan Leonidovich Kalmykov, court artist to the Czar of Russia.

The search was instigated at the request of Mrs. Kattiska L. Meyer, of Shanghai, sister of Kalmykov, one of numerous claimants to the property. The bank is unable to find any record of when the collection was stored, although Kalmykov exhibited it here three years ago.

Kalmykov died here in 1925 and is supposed to have left a will providing for the return of the collection to Russia when the United States recognized that government.

Corn Borer Plays Havoc

Windsor, Ont.—That the European corn borer had reduced the price of land in certain parts of Essex County at least 60 per cent, was the statement made before a meeting of the Essex County Council by Judge Miller, provincial agricultural agent. The end of the Essex corn belt was predicted by Mr. Miller, who declared the county was faced with the necessity of finding equally remunerative crops.

Edmonton Woman Elected

Ottawa.—Mrs. J. J. Duggan, Edmonton, was elected first vice-president at the closing session of the Catholic Women's League of Canada. Mrs. B. C. McLean, of London, Ont., was re-elected president.

Wembley Buildings Sold

Go To Private Purchaser After Auction Sale Abandoned

London.—The "white elephant" structures, as the colossal buildings including the stadium of the Wembley Exhibition, were many times described, have finally been disposed of, it is authoritatively stated.

A public sale was held at the Wembley grounds June 15 and the buildings, together with 130 acres of ground, placed on the auction block, but after a few minutes of bidding during which the highest price offered was £215,000 (approximately \$1,535,000) the sale was abandoned.

The auctioneer remarked he had received a better offer privately, and it was declared the buildings and grounds had been sold to the maker of the private offer.

The name of the purchaser and the price paid were not divulged.

Ban On Conscription

This Subject Occupies Attention At Geneva Meet

Geneva.—The problem of conscription and the possibility of France and other nations with big armies contributing to the cause of disarmament by restricting conscriptions loomed up as a big factor at the disarmament meeting. France, which submitted a memorandum to the conference of experts, insisted that the question involved is essentially political, and therefore must be handled by the full commission or an eventual conference, but did not declare herself opposed to its consideration.

Interest has been created by the fact that France at least decimates the limitation of trained reserves as a theoretical possibility.

Send Out British Gunboats

In Effort to End Banditry in Chinese Province

Canton.—British gunboats have been dispatched to Nanning, Kwangsi province, to put an end to the banditry and robbery which resulted recently in the kidnapping and murder of J. M. Phillips, British manager of the Asiatic Petroleum Company.

Phillips' body was found in the West River at Nanning, June 8, several days after he had been carried away by bandits who demanded ransom. Soldiers were sent to rescue him and the bandits, hard pressed, are believed to have killed Phillips and thrown his body into the river.

China Leaving League Is Report

Geneva.—The newspaper Genevois says China, following the example of Brazil, will resign from the League of Nations this autumn because Chinese interests are not sufficiently protected by the league. There is no confirmation of the report.

Bulgarian Peasant Shot

Sofia, Bulgaria.—Two Greek border guards are reported to have shot a Bulgarian peasant at the frontier. Bulgarian officers have demanded a meeting with Greek officers for the purpose of an investigation.

GRAIN ACT BILL TO BE DEALT WITH BY COMMITTEE

Ottawa.—The act to amend the Canada Grain Act, which was introduced in the House of Commons by Milton Campbell, Progressive, Mackenzie, Sask., was referred to the committee on banking and commerce by the speaker. The bill, which has passed all stages in the house, proposes to give the farmer authority to designate the terminal elevators to which he desires his grain to be shipped, and also, in another clause, makes Moose Jaw, Sask., an order point for grain shipments.

The second reading of the act to amend the Grain Act was moved in the senate by Hon. W. B. Willoughby. Mr. Willoughby traced the history of the co-operative elevator movement in Saskatchewan and the development of the wheat pool. He claimed that the grain commission had intended to give the right to the farmer to designate the terminal elevator to which he wishes his wheat shipped. Farmers complained that in many private elevators there was mixing of grain from which he received no benefit, nor did he participate in the profits arising from overseas sales. Willoughby said that this bill had been criticized on the ground it would confiscate private interests in terminal elevators. He claimed there was no such object or intent in the bill.

Senator W. B. Willoughby, Conservative leader in the senate, thought a measure of this importance should be sent to the banking and commerce committee, where evidence, both from the wheat pool and the elevator interests, could be given. Senator Willoughby urged that a special committee be selected, and was supported in this by Senator Dandurand. Sir George Foster felt that to send this bill to a special committee would be to arouse suspicion and distrust, and urged that the banking and commerce committee be selected. This was done on the motion of Senator Ross.

Ontario Elections Predicted

Premier Ferguson Makes Announcement At Orillia

Orillia, Ont.—Announcement that the Ontario Government would go to the polls in about 13 months on "any policy which might be deemed the best for the people, and that there would be "no listening to extremist views" in the handling of the temperance question, was made by Premier G. Howard Ferguson, in his address to a monster Conservative picnic here. His administration, he said, would persist in efforts to bring Alberta and maritime coal to this province.

Premier Ferguson expressed the opinion that there was no reason why the Dominion should produce 15,000,000 tons of coal annually when there are such rich fuel resources in this country.

Bags Enormous Wolf

Winnipeg.—George Kemp, who spent the winter at Norway House, brought to Winnipeg recently the skin of what is believed to have been the largest grey wolf ever shot on the American continent. The wolf, which was shot by C. Herman, a trapper, measured seven feet six inches from tip to tail. The wolf was shot 200 miles northeast of Norway House.

Rescue Crew Of British Ship

Tokio.—All members of the crew of the British freighter City of Naples were rescued by the Japanese cruiser Kasuga and destroyer Uragaisa, the Kasuga reported by wireless to the navy department. Seventy-three men were taken off the freighter, which went aground about 150 miles south of Tokyo.

Yacht Owner Protest

New York.—Shots fired at the private yacht Aloha, owned by Arthur Curtis James, New York capitalist, while enroute from New York to Newport, presumably by a rum boat chaser, have been made the subject of a protest to Washington, while alleged provocative firing by a coastguard patrol boat at Miami, Fla., is under investigation.

A British expedition in Northern Fayum has found baskets 7,000 years old belonging to the Libyan Flint Age.

Splendid British Family Comes to Canada

Here are Mr. and Mrs. Davies and their eight children, from Machen, Monmouthshire, England, bound for Edmonton, Alberta, for farm work. The cost of the passage of the whole family is less than one ordinary fare, as they came out under the 3,000 family settlement scheme. The Canadian Pacific liner Montcalm left Liverpool recently with 2,000 emigrants on board bound for Canada under the 3,000 family plan, many of them paying only \$3 for their passage.

Edmonton Exhibition.

"The biggest and the best
Fair ever held in Edmonton"
is the consensus of opinion of
those who are familiar with
the arrangements for the Ed-
monton Exhibition and His-
torical Pageant, July 12 to 17.
There have never been such
outstanding head-line attrac-
tions. The famous H.M. Cold-
stream Guards Band, universally
recognized as one of the premier
musical organizations of the world,
will in itself be worth a great deal
more than the cost of admission.
Then there is a grand Historical
Pageant, celebrating the coming
of age of the city and province,
with a cast of 600 persons, all
working together in a mass
of color and a maze of movement on
a huge, specially constructed
stage. This mammoth spectacle
will tell the thrilling story of the
development of Edmonton and
western Canada.

Other attractions include the
richest exhibits of agricultural and
dairy products from a number of
electoral districts in northern and
central Alberta; one of the best
grand stand attractions a ever seen
in the West; the renowned Johnny
J. Jones midway shows; excep-
tionally brilliant fireworks displays;
horse races each afternoon; valu-
able collection of oil paintings from
the Metropolitan Museum of Art,
New York; championship cat and

Swimming Pool at Chateau Lake Louise Opened

1. Going to sleep. 2. Rotarians at opening of the new pool. Two inches of the party about to test the
swimming depths. 3. Caught between the mountains and the water, this man seems to be flying up to
the sky, while she is really going down.

The second largest swimming pool
in Canada has just been opened
at Lake Louise. Situated on the
Terrace between the Dining Room
of the Chateau and the Lake, this
new pool is one hundred feet long
and forty feet wide. It receives its
water from the Virgin depth of Lake
Agnes, which is located up in the
summer snow zone between two
mountain peaks, twelve hundred feet
above the Chateau. This water is
clean, heated to 78 degrees.

The new pool is surrounded by
tall concrete columns between which
there are gigantic sheets of plate
glass giving its walls full openness
yet providing a wind-break against

cool breezes. The top is entirely
open to the penetrating rays of the
Rocky Mountain sun. Each of the
twenty columns around the pool is
surrounded with hot growths of
beautiful Rocky Mountain flora
which, coupled with the delicate
green hills of the plate glass win-
dows and the mountain greenness of
the pillars, lends an intriguing at-
tractiveness to the open greenness of
the Mt. terrace campus of the Cha-
teau, incorporated here and there
with vivid yellow and orange beds of
Island poppies. A beautiful and
unique feature of the pool is the
swimming suits, all of which are of
a flaming orange color to harmonize

with the alencing beds of poppies
which run down from the dining
room and surround the pool on all
sides.

At the deep end of the pool are
three diving boards, two of which
are three and a half feet high and
the other board ten feet, providing
the standard Olympic heights.

Olaf Anderson, famous swimmer
and skater, and former life guard
instructor at Chicago, has been en-
gaged as the permanent swimming
instructor, with an assistant.

A large number of Rotarians at-
tended the first day of the opening
of the Chateau Lake Louise pool.

CHAPTER VII.—Continued

"I promise Miss Manners that I shall always be ready to believe—whatever she wishes to tell me, and that I shall keep myself at her side, eagerly listening." Smiling down at the girl, he murmured, softly: "Shan't we make that a bargain?" Then the careless came into his voice: "Shall we set apart an evening for the beginning of our devotion?" Tomorrow, I petition most humbly!

She hesitated, confused, her glance falling. She was about to turn again to John, but Brandon sensed the impulse and touched her wrist with his fingers. She shot her eyes up to his quickly. "The touch burned her, but she decided instantly to accept his challenge."

He did not give his hand to John, but bowed lightly. Joanna went into the hall with him. Quite suddenly he put his hand on her shoulder and brought her around until she faced him.

"Don't make mistakes, Joanna," he said, earnestly. "There's a destiny before you, now. Your perspective isn't that of the shop girl any longer. Suddenly his nonchalance returned. She felt that the smile at his mouth was mocking her again, and that he was really taunting her, when he once more lifted her fingers to his lips. She tried to persuade herself that he was just a different kind—the difference of breeding, blood and association, from the boys who called her "kid" and asked for a kiss as soon as they happened to be alone. His difference from John—that pushed her! For John wasn't like any of the other boys, or men, either. He always wanted to

Criticism From U. S.

Men Who Dump Aliens Across Border Are Severely Censured

Severe criticism of "degraded men" on the Canadian side of the international boundary who induce people to pay over virtually all the money they have to bring them safely into the United States, and then "dump them across the line and let them shift for themselves," is contained in a report of the New York State Commission of Prisons. The report describes such practices as deplorable.

"The commission should urge the United States authorities to call the attention of the Canadian authorities to this practice and see if the men who are responsible for it cannot be apprehended and punished," the report says.

wondrous thing with his architecture! "John! John! John! the low word moaning, as if it was a pleading out of her soul."

He nodded, as if he thought he had caught her thought, and he thought he thought they must be, agreed with them. She rebelled against that not instantly, and called to him her protest:

"John! What is it—what!"

He didn't mind, but spoke in the same even, dead cold tone:

"You mustn't lie to me, Jo," he said. "These days are what they are, and you girls are what you are. Money, money that you can't explain, doesn't come to you know that when you can't explain it is because you don't want to, or somebody doesn't want you to. So drop the pretense, Jo, and for the sake of what we've been to each other, and what I've hoped we would be to each other, tell me—as much as you dare."

While the girl fought hard to ease the pain in her brain, he dropped his eyes, and a sad, quizzical smile touched his mouth. "When he looked up he added: 'You can trust me, Jo. I won't reveal any of your secrets, or anyone's else.'"

It was no trick, now, that sent Joanna's hands beating against his breast. All the trickeries had gone out of her aching little body. It was a girl who was maddened by the hurt he had given her, and who was fighting as a girl fights for the trust that is being denied her. "There is nothing more to tell," she cried frantically, while her hands beat as if to drive understanding into him. "I didn't know the money was given me, nor by whom. You must believe me, John, and help me."

"I don't know why the money was given me, nor by whom. You must believe me, John, and help me."

was bothering John—jealousy so profound that it obscured the larger events of the day. He was coming John," she pleaded. "I didn't ask, 'T' just met him today, at the bank, and I didn't want him. I wanted to be with you alone."

John got onto his feet, looked down into the troubled eyes, and pushed past the waiting form. He went over to a table and picked up a book, fumbled it a moment, and then dropped it sharply. He swung around and faced the girl who was watching him, her slim breast rising and falling slowly.

"Well, Jo! I dare me the straight of it!" he demanded, quietly. "Mrs. Adams has given me the story you told her. We agreed, of course, it's fishy. But it may be all right for her. You owe me the truth!"

Joanna caught her breath. Her impulse was to cry out, but she checked it. She felt her body growing rigid. She stared at the young man who leaned against the table regarding her coldly, coolly, mercilessly. He was the only link with her childhood, with her mother's gleaming beds, with the school days and birthday days of the little town which had been her home—her home. He who had come also to the city to work out his career, and who had found her, sympathized with her occasional moods of loneliness, loved her and humored her tempers and her ridicule of him because he was so "slow," but always wanted to be with her in the home they'd have for their very own, some day; that he would build and make a

be as you ought to be. You've laughed at me, and called me a fool, when I've told you that what you and your friends think is smart is only polished dirt. I wasn't old-fashioned, Jo; it was only that I wanted my girl to be a credit, and better—and safer! I could never get away with it. Though—so whatever it is, it's happened, hasn't it?"

He had not raised his voice. He had kept his even tone. The sorrowful, quizzical smile remained at his lips. Joanna was helpless; every fibre of her was wounded and useless.

All that she could say was: "You really don't mean it—John! You don't think that I would . . ."

"Think?" he replied. "Think? Why, what I am thinking is, that even tonight, when you must have known that you would have to tell me something, some better lie than you planned, you met me—met me with this other man here—too—in a gown like that! Half bare! True to the law to the morals of your kind, and your crowd!"

She heard her own voice, still pleading with him; but it sounded as if it were coming back to her from a great distance. The horror in her eyes had spread through her body and numbed it. She laughed, and cried out that he was playing with her. Then she felt into a clasp and shook it with her sob. But, so suddenly that it surprised the man who watched her, she got onto her feet and faced him. Her words were very distinct, now:

"You said a while ago, John, that you couldn't get away with it when you said it to be different than I was—wasn't my kind and my crowd. Well, there's a lot more just like you! You didn't have anything to get away with. And you're not getting away with anything now!"

She thought, calmly, that he would protest, and that after a while he would be himself again, and take her into his arms, and ask to be forgiven, and believe and kiss her. She would explain about Brandon, about Graydon and Reginald, and the would enter her mystery with her. But he went out of the room, slowly, put on his hat and coat, and shut the door behind him.

Joanna sank to the floor, in the dead end of the pretty place of the apartment box in which she had treasured the only jewel she had.

(To be continued)

A MEDICINE THAT ALL MOTHERS PRAISE

Baby's Own Tablets Banish Babyhood and Childhood Ailments

Mrs. H. Oakes, Sarnia, Ont., says: "I have used Baby's Own Tablets in home for more than fifteen years and I believe the good health my children enjoy is due entirely to this medicine. The Tablets are mild at testing time, relieve colic and are always beneficial in the minor ailments of infants. I have recommended Baby's Own Tablets to other mothers whose experience with them has been as satisfactory as my own."

Baby's Own Tablets do one thing only, but they do it well. They act as a gentle laxative which thoroughly regulates the bowels and eases the stomach, thus banishing constipation and indigestion; colds and simple fevers and turn the cross, sickly baby into a well, happy, laughing child. Baby's Own Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

But this I say, brethren, the time is short.—I Cor. vii, 29.

They are such dear, familiar feet that go Along the path with ours—feet fast or slow. And trying to keep pace—if they mistake. Or tread upon some flower that we would take. Upon our breast, or bruise some rose, Or crush poor Hope until it bleed, We may be sure. Not turning quickly to impute Grave fault; for they and we Have such a little way to go—can be Together such a little while along the way.

We will be patient while we may. How careful one ought to be to be kind and thoughtful to one's old friends. It is so soon too late to be good to them and then so is always so grievous.—Sarah Orne Jewett.

Given Name From Story

How Gold Mine Came To Be Called Filin Flon

How the Filin Flon, Northern Manitoba's copper mine, got its name was related at the annual meeting of the Mining Corporation, held recently.

A party was paddling down the lake on which the Filin Flon discovery was made. A book was found on the shore containing the story of a Chinese named Filin Flon, who discovered a hot springs lake. Filin Flon invented a boat in which he made a trip to the bottom of the lake, the story says. His journey took him into a new world, where women were bogies instead of men. "This did not suit Filin Flon—on of them said: 'This looks like the place where Filin Flon came up—'"

A few days later when the party discovered the historic break which has now become Filin Flon mine—one of them said: "This looks like the place where Filin Flon came up—"

So they called it "Filin Flon" and Filin Flon was incorporated.

Her Heart Palpitated She Had Fainting Spells

Mrs. J. Wilson, Port George, N.B., writes:—I suffered from palpitation of the heart and fainting spells, and, at times, I could not be left alone I was so nervous.

My trouble was caused from overwork and worry, having been left alone with a large family. I had tried everything, without any relief, but I know, to-day, that I would have been a nervous wreck but for your wonderful

STRATFORD WOMAN

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Stratford, Ontario.—"After my first baby was born I started to work on the tenth day and did a big washing on the twelfth day. Being so young (I was married at 19) I did not know what was the matter, so let it go until I was all run-down, weak and nervous, and had a bad displacement. For nearly two years I could not sleep and I would always complain of having 'hot' a head-ache, but a brain-ache. My mother is taking Lydia E. Pinkham's Vegetable Compound during the change of life and she recommended it to me. After taking two bottles I began to get little sleep and to feel better and I have never felt off since then, except for about three months. I can safely say I have taken thirty bottles since my second baby was born. I think it makes child-birth easier, as I had terrible pains with my first three children and very few with my fourth as I was so much stronger, and now able to do my work alone, but I am still taking the Vegetable Compound as I am a nervous baby."—MRS. OMER PAUL, 44 Cherry Street, Stratford, Ontario.

If you are suffering from any weakness which causes such symptoms as pains in the side and back and nervous feelings, give Lydia E. Pinkham's Vegetable Compound a trial now.

VOTE "I" FOR WASHBURN.

In voting for a candidate an elector should exercise the same care as he would if engaging a manager for his business.

The main question should be "What are his qualifications and his record?" You judge a prospective employee, not on what he promises to do, but what he has done.

The Liberals have a record of sixteen years of office in this Province. This record they do not and cannot defend. The public, however, has not forgotten it.

The Conservatives have no record at all. Their return, as that of the Liberals, would mean a return to the party system and all that it implies.

The U. F. A. ask for your vote, on June 28 on their record for the past five years. They offer a continuation of sound business administration for the benefit of the people of Alberta as a whole, and not, as in the party system, for the benefit of party friends.

The only argument Liberals and Conservatives offer is that of promises. The Government's argument is performance.

During the past five years the cost of administration has been reduced 14 per cent., the Civil Service has been transferred from a basis of patronage to a basis of merit, a real highway policy has been put into effect, health and education services have been increased, etc. Efficiency is much greater in every department of government as a result of transference from a basis of party favoritism to one of business administration.

Issued by the U.F.A. Publicity Committee, Calgary.

Spruce Grove Annual Picnic

Held by Spruce Grove Community Club, on

Wednesday, July the 7th.

ALL KINDS OF SPORTS.

HORSE RACES. FOOTBALL.

BASEBALL. BASKETBALL.

GENEROUS PRIZES.

Dance in Evening. Edmonton Orchestra

Stony Plain and District.

A large turnout of players was seen at the football practice Saturday night on the Fair Grounds, and everything is now in readiness for the opening game.

Peter Kulak, the popular young gent of Rosenthal district, gave a party on Sunday last to a number of his young friends, celebrating the anniversary of his natal day.

Mr. Lundy's meeting in town Saturday night was presided over by John Duchoise, and R. B. Wells gave a timely discourse.

No exams will be held at the local school on Monday next.

The local school closes on Wednesday next, June 30th, the vacation extending to August 30th.

The construction gang which predated the new Brooks elevator have finished their job and moved. The machinery is now being installed.

The Royal Hotel is now resplendent in its new coat of paint, a la St. Patrick—green and white.

Dr. Oatway's supporters have been conducting a quiet but effective campaign among the electors, and the claim is made that the doctor will be among the leaders when the vote is counted.

On Friday, July 2d at Holborn Hall, Mr. Jas Warner, the well-known farmer of Stony Plain and Holborn districts, intends giving an entertainment on a large scale to his many friends, celebrating the 'steenth anniversary of Jim's birth. If you know Jim, you're welcome.

"The best of the season" was the verdict of those who attended the dance at Holborn Hall Friday night last. Kotschero's Orchestra furnished the music, with satisfaction to all. The same bunch of music-makers play at Jim Warner's birthday dance at the same hall Friday evening, July 2d.

Holborn U. F. A. holds its regular monthly meeting Saturday evening, July 3d.

Concordia College closed on Tuesday, and all the students from Stony Plain district have returned to their homes here.

Candidate Washburn's meeting at Rosenthal on Monday was fairly well attended, and Messrs Thompson and Fast, of Edmonton, each gave a rattling address.

A lady from the old country has come and would like to do housekeeping. She is 49 years old, is well and strong. Please see Mr. Odenbach.

Great preparations are being made for the big sporting event to be held at Duffield on Saturday next. Should the weather prove favorable, this will be the best sports day ever held there.

A poster giving information regarding competitions for the destruction of gophers, crows, and other agricultural pests, issued by Game Commissioner Lawton, has arrived, and may be seen at The Sun office.

The new postal reduction on letters from 3c to 2c comes into effect July 1. The rate on drop letters and postcards remains the same.

Calendar.

June—
24—Picnic at Winterburn.
26—Big Sports Day at Duffield.
28—Provincial Elections.
July 1—Dominion Day.
1—Dance at Stony Plain.
2—Jim Warner's birthday party at Holborn Hall.
2—Dance at Coates Barr, at Mowassau.
3—Auction Sale at L. Zilliox's Warehouse.
7—Community Picnic at Spruce Grove.

Spruce Grove Notes.

Geo Harris, the well-known insurance man, was a visitor in town Tuesday.

Lutheran-Peace Church on Railway Ave has just been painted, and a good job has been done.

A big time is expected at the community picnic at Winterburn Hall this afternoon. There will be a concert by Martin's Orchestra in the evening.

All the Grove's ball-players took a day off on Sunday last, visiting the beaches and other pleasure resorts. They expect to meet Stony's team at the picnic here on the 7th inst.

Confirmation service was held at Peace Church on Sunday last. Seven made the promise; John Unterschuetz, Jno Breuensuhl, Emil & Herman Schram, Mary Singer, Carrie Breuensuhl, Mary Ulmer. The church was crowded to overflowing.

The lawn party given Tuesday evening by the Union Ladies' Aid was well patronized, in spite of the counter attractions.

Murd McKinlay's meeting here Tuesday evening attracted quite a crowd. D. Brox was in the chair. Mr. Collison and several other gentlemen from the City gave addresses.

While driving along the base line east of R. Buerlein's farm on Sunday morning last, three young men from the City named Lexis Cook and Jack Stone, both of Alberta College, and Tom Olson, had the misfortune to have a back tire on the "big" they were driving explode. The vehicle overturned, throwing the occupants out, breaking Cook's jaw, and seriously injuring Olson. The driver, J. Stone, escaped with a few scratches.

Chas Giestinger, the Golden Spike farmer, had a valuable cow killed on Saturday last on the road just east of Wuerz's blacksmith shop. The animal was run into by a big car, which proceeded on its way after the accident.

Why Druggists Get Gray.

A druggist in the City had this note sent him, recently: "My baby has cut its father's parish plaster. Send an anecdote quick by the enclosed girl, also send a bottle of O. Dick alone, as I am a little historical."

Railway Time Table.

Going east, 7.15 a.m. every day but Tuesday.
Going West, 10. p.m. every day but Sunday.

VOTE FOR
M'Kinlay.

Here and There

S. Janowski and B. Stankever, the former Polish immigration delegate and the latter a delegate from the Polish Minister of Agriculture, are in Canada for a six-week study of farming conditions in western sections of the Dominion. They will also look into the distribution of work among the Polish colonies in Canada.

Four fishermen from the United States went fishing on the Chino River, near Brunswick, for 13 days recently, and caught 340 fish. State Senator Bradford, of Indiana, caught a 43-inch salmon weighing 27 pounds. Others in the party were: Fred N. Peet, Dr. E. R. Zimmerman and D. H. Faxon. Only barbed hooks were used so that no fish were either killed or injured.

The second largest outdoor swimming pool in Canada has been opened at Lake Louise on the Terrace between the dining room of the Chateau and the Lake. The new pool is 100 feet long and 40 feet wide. It is surrounded by tall concrete columns between which there are gigantic sheets of plate glass, providing a wind break against cool breezes.

Approximately 120,000 live fish, fresh from American hatcheries, passed through Dominion Express Yards, Windsor Station, Montreal, recently, on their way to Beauchaine, Quebec. They will be used to stock private lakes in northern Quebec owned by wealthy citizens of the U.S.A., who prefer the virgin hills and forests of Canada to the densely populated summer resorts of their own country.

Norman E. Wilkinson, London, England, inventor of camouflage paintings which was used extensively during the late war, arrived in Canada on the Canadian Pacific liner "Montcalm" with his wife recently, for a tour of the Dominion. Sir Clifford Sifton, prominent Trontonian, and Sir Stephen Pranton, M.L.M.E., famous mineral geologist, also arrived on the same vessel.

Col. C. H. D. Ryder, C.B., C.I.E., D.S.O., chairman of the Air Survey Company of London, England, interviewed Premier Mackenzie King and the prime ministers of the various provinces with regard to finding out the prospects of surveying practically the whole of the Dominion by air. He also wishes to know about the possibility of combined federal and provincial action for these surveys.

On his return from a recent tour of inspection of the Company's Western Lines, Grant Hall, Vice-President of the Canadian Pacific Railway, stated that exports to the Orient in the form of grain, flour, dressed meat and motor cars were steadily increasing in volume and that trade with Australia had been considerably stimulated by the trade arrangements with that Dominion. Mr. Hall added that conditions were good in the West. The mining industry in British Columbia showed up well, while lumber shipments were heavier than last year.

All roads led to Windsor Station, Montreal, for three days prior to the opening of the tenth annual international Kiwanis convention, which opened on June 6. Not only was the C.P.R. station the Kiwanis headquarters, but every one of the delegates, their wives and friends, about 7,000 in all, congregated there as the station had been constituted registration headquarters of the convention. A force of 32 stenographers was specially engaged to handle the work.
